PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience in **Python, SQL, Flask, Pandas, NumPy, Scikit-learn, REST APIs**, and full-stack **development**. Developed **AI/ML** applications for classification and network intrusion detection, along with database-driven applications using **React, MongoDB, and IPFS**. Strong foundation in **OOP, Data Structures & Algorithms, DBMS, Computer Networks**, and **SDLC**, supported by practical internship experience in data processing and troubleshooting.

TECHNICAL SKILLS

Primary: Python, AI/ML (Scikit-learn, Pandas, NumPy, Random Forest), SQL, Flask

Secondary: React.js, MongoDB, REST APIs, Node.js/Express.js

Additional: JavaScript, Java, C++, Linux, Bash, Git, VS Code

Core Concepts: Data Structures & Algorithms, OOP, DBMS, SDLC, Computer Networks

RELEVANT PROJECTS

AI-Powered Network Intrusion Detection System — Python / Random Forest / Scikit-learn

- Developed a machine-learning-based network intrusion detection system using **Python** and **Random Forest** to classify network traffic and identify malicious activity
- Applied data preprocessing and feature analysis to the **NSL-KDD** dataset and evaluated model performance using classification metrics

Heart Disease Prediction System — Python / Flask / Pandas / NumPy / Scikit-learn / SQL

- Developed a **Flask**-based heart disease prediction application using **Python, Pandas, NumPy**, and **Scikit-learn** for data processing and classification
- Implemented data preprocessing and model evaluation workflows, integrating prediction functionality into the **Flask** application with **SQL**-backed storage

Full-Stack E-Commerce Platform — React.js / Python (Flask) / MongoDB / REST APIs / IPFS

- Developed a full-stack e-commerce platform with a **React**-based frontend and **Python** backend for product management and user interactions
- Integrated **MongoDB** for data persistence and **REST APIs** for communication between frontend and backend components
- Implemented **IPFS**-based product/content storage as part of the application architecture

EXPERIENCE

Industrial IoT Data Intern — NIT

Jun 2024 – Jul 2024

- Debugged and troubleshooted** industrial IoT data processing workflows, identifying issues and improving system reliability while reducing downtime by 15%
- Improved system response time by 20% through consistent, detail-focused problem-solving

Virtual Cybersecurity Internship — Cisco / AICTE

Jun 2023 – Jul 2023

- Completed a Cisco/AICTE cybersecurity internship covering **networking fundamentals, network security concepts**, threat identification, and security best practices

CERTIFICATIONS

- TCS iON Edge — Young Professional (2025)
- Tata GenAI Powered Data Analytics (2025)
- Cisco / AICTE Virtual Cybersecurity Internship Certificate (2023)

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering — Networks Specialization

Kakatiya Institute of Technology & Science (KITS) | 2022 – 2025

Relevant Coursework: DSA, OOP, OS, Computer Networks, Algorithms, DBMS, Software Engineering
