PROFESSIONAL SUMMARY

Aspiring Software Engineer | Cybersecurity & Blockchain Enthusiast | Skilled in Java, Python, SQL, and Web Development. Strong foundation in problem solving, OOP, Agile methodologies, and microservices. Hands-on experience in cybersecurity, blockchain, and IoT through internships and projects. Eager to contribute to innovative, data-driven, and secure software solutions.

EDUCATION

B.Tech in Computer Science Engineering (Networks)

Kakatiya Institute of Technology and Science (2022 – 2025) | CGPA: 7.09

Diploma in Computer Maintenance Engineering

VMR Polytechnic College (2019 – 2022) | 68%

Sangamithra E-Techno School (2016 – 2019) | GPA: 8.8

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Databases & Tools: SQL, MongoDB, Git, VS Code

Frameworks & Web Development: HTML, CSS, React.js, Flask, Django

Core Competencies: OOP, REST APIs, Agile, Networking, Cybersecurity, Blockchain, Microservices

CERTIFICATIONS

- Cisco AICTE Virtual Internship in Cybersecurity – Cisco & AICTE, 2023
- TCS iON Edge – Young Professional – TCS, Aug 2025
- Tata – GenAI Powered Data Analytics Job Simulation – Tata, Aug 2025

INTERNSHIPS & TRAINING

Cisco AICTE Virtual Internship – Cyber Security (June 2023 – July 2023)

- Gained practical exposure in network security, vulnerabilities, and cyber threat response.
- Hands-on security labs & simulations to identify and mitigate risks.

Industrial IoT Internship – NIT Warangal (June 2024 – July 2024)

- Developed predictive maintenance models using real-time sensor data.
- Improved industrial response time by 20% and reduced downtime by 15%.

PROJECTS

DNS Spoofing Detection System | Python, Flask, Scapy

- Built a real-time security tool to detect and prevent DNS spoofing attacks.
- Developed a Flask-based dashboard for monitoring spoofed IP alerts.

Optimizing e-KYC Using Distributed Ledger Technology | Solidity, MetaMask, IPFS, Python

- Designed a blockchain-based KYC system using Ethereum smart contracts.
- Ensured immutable verification & secure data storage with IPFS.

Soft Skills

- Team Collaboration
- Analytical Thinking
- Problem Solving
- Effective Communication
- Leadership & Time Management

Achievements

- Contributed to multiple Hackathons & Coding Challenges, demonstrating strong problem-solving and team collaboration skills.
- Designed and deployed a Heart Disease Prediction System using SVM & Flask, showcasing expertise in AI/ML and web development.
